

Guidance for Producers Holding In-Person Callbacks

Equity does not require a safety plan for callbacks. For your guidance, the following include our suggested best practices for callbacks:

- If all personnel (creatives, employer representatives and actors) are not fully vaccinated as defined by the CDC, callbacks should be held outdoors. If tents are used, flaps should remain open.
- A COVID Safety Officer should always be onsite.
- Call times should be staggered with appropriate time for cleaning, disinfecting and air changes.
- There should be a designated area for early arrivals.
- All personnel should remain socially distanced 10 feet or more.
- All scripts and sides should be single use.
- The use of props or any communal objects should be prohibited.
- All personnel should fill out a symptom-screening questionnaire and undergo a temperature check before entering the premises.
- All personnel should wear a mask. Actors should wear a mask except while actively auditioning. The time spent unmasked should be as minimal as possible.
